

# Thermal Drain™

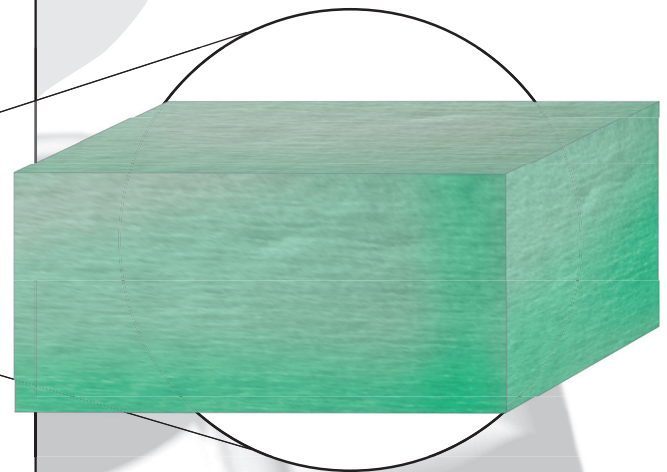

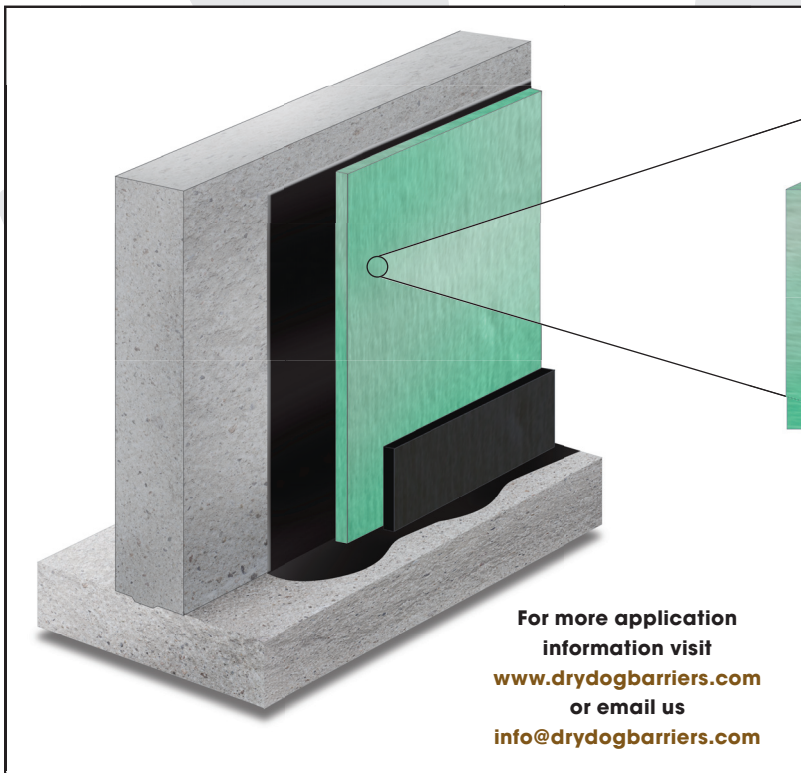

DryDog Barriers • 888-5-DRYDOG

**ThermalDrain™** is a user friendly synthetic protection board that is a great alternative to fiberglass. **Thermal Drain™** is more durable than fiberglass and provides excellent drainage. **ThermalDrain™** is also the only protection board providing R-Value that contains 70% post-consumer recycle content. Our environmentally friendly drainage board will not irritate your skin and is easy to work with. **ThermalDrain™** is designed to be used with spray applied waterproofing and when used with **BoneDry™ WPT** from DryDog Barriers provides a great system of protection for many years to come. Contact DryDog Barriers today for more information on how to go **GREEN** with **ThermalDrain™**.
